
Opening intervention: crack-location response and switch interval
Solid geometry: 36 boolean-geometry failures; no scientific curve imputed.
(a) Location response
tested openings, seed 1
tested openings, seed 2
widened piers (60 mm), seed 1
widened piers (60 mm), seed 2
main-crack location proxy (mm)
settlement-profile pivot x_p (mm)
(b) Observed switch interval
test seed 2
piers60 seed 2
test seed 1
piers60 seed 1
largest-jump interval in x_p (mm)
